## TECHNOLOGIES

**Postgres** — 4 years experience  
**Phoenix** — 4 years experience  
**MySQL** — 2 years experience  
**Rails** — 2 years experience  
**Kafka** — 2 years experience  
**Kubernetes** — 1 year experience

## LANGUAGES

**Java** — 4 years experience  
**Elixir** — 4 years experience  
**SQL** — 4 years experience  
**C** — 2 years experience  
**Ruby** — 2 years experience  
**Python** — 1 year experience

## EXPERIENCE

- 2017 – Current      **Software Engineer** – IBM Hybrid Cloud      **IBM**
- Maintained an existing Ruby backend for a file transfer product in the IBM Cloud product stack.
  - Designed and built out a WebSocket delivery microservice for all the IBM Cloud Products based on a shared Kafka component.
  - Designed, built and performed product management duties for a new product in the IBM Cloud that allows non-technical users to automate their file transfer workflows with a block-based editor similar to scratch.
  - I am currently building a new cloud filesystem product that will allow users to unify their object and on-premise storage across all data centers and cloud environments.
- Ruby / Elixir / Kubernetes / Kafka
- 2015 – 2018  
part time      **Co-Founder and Backend Developer**      **Moder Inc.**
- Built the Android app and backend for a photo sharing app called Moder.
  - Built the backend for an app that allowed Gonzaga students to see and rate the food at our dining hall that which made a splash in the local Spokane news <https://bit.ly/1R73VSP>
  - Built the backend for an app that allowed a local grocery store to send coupons to their customers.
- Elixir / Android / Java
- 2013 – 2014  
part time      **iOS and Android Developer**      **Nerdy Dragon**
- Worked on various one off marketing sites for new video game releases.
  - Built an addon keyboard for Android and iOS that let you create and use custom stickers in messaging apps called ArTomoji.
- iOS / Android / Java
- 2013 – 2014  
part time      **Junior Java Developer**      **Home Inspector Pro.**
- Created a service that would automatically add missed phone calls from the support phone line to a dashboard for support engineers.
  - Created a license database and generator for the support engineers; so that they could reissue licenses to customers without having to email the owner to do it for them.
- JavaEE / JavaScript

## EDUCATION

2014 – 2018

**Bachelor's of Science** – Computer Science

**Gonzaga University**
